

Νάνσυ Καρανάσιου
Ehealth forum 2016

Main Steps to participate in EU funded projects

- **Analyse existing regional and national health and social care** policy documents and align your first ideas with their priorities to the extent possible
- **Proposal preparation**, Once a decision is reached to introduce the new service, talk to involved stakeholders. These include end users, patient groups, elderly groups, the e-health industry, the academia, health and social care professionals and other public institutions that have similar needs.
- **Align your priorities** with national priorities in e-health and public health as in National Policy documents and relevant H2020 and 3rd Health Programme Documents
- **Start small pilots**, to see the results of the use of ehealth/mhealth services and advance forms ideas to the planning phase
