NATIONAL DOCUMENTATION CENTRE

ePublishing

EKT Open Book Press:

A case study for a successful institutional publishing initiative

Use of open source publishing platforms

Active engagement in European consortia and EU-funded projects

Effort commitment in developmental initiatives

Provides services to scientific institutions/non-profit publishers and enables their engagement in open scholarly communication

Successful open access business model

- Comprehensive publication management approach based on optimal editorial and content dissemination workflows
- An effective dissemination medium for scholarly publications in a minority language

eBooks

Sustainable approach based on the complementarity of EKT's and publishers' activities

Standardization of publishing services and workflows

Reciprocal benefits: Supports EKT in its role as a national node for scholarly communication and facilitates transition to online publishing models

EKT's dedicated platform for electronic monographs and edited volumes

Bibliodiversity: focuses on monographs as an essential component of SSH scholarly communication and enhances the promotion of relevant literature in Greek

Enables initiatives by agents with otherwise limited access to the mainstream publishing industry

EKT's participation in the HIRMEOS project

HIRMEOS: enhancement of technical capacities and services provided by five important publishing platforms

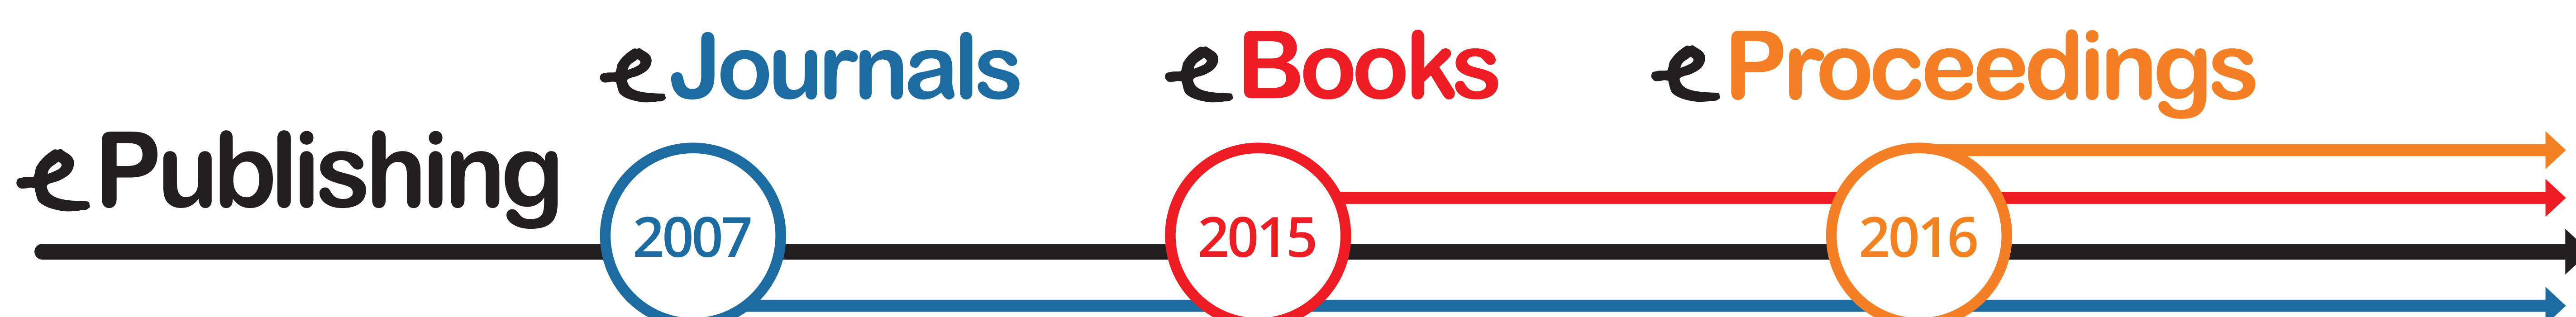

EKT's contribution multiplies the impact of received funding. Implementations available to the wider OMP user community

Development of tools to support:

- content certification services (DOAB)
- unique identifiers to publications (DOI) and contributors (ORCID)
- entity fishing and recognition of tag named entities in monographs (NERD)

ePublishing.ekt.gr

Enables the transition to open access publishing and provides access to peer-reviewed scientific content
