MSCA National Contact Point, Greece

ΕΘΝΙΚΟ ΚΕΝΤΡΟ ΤΕΚΜΗΡΙΩΣΗΣ &
ΗΛΕΚΤΡΟΝΙΚΟΥ ΠΕΡΙΕΧΟΜΕΝΟΥ

The National Documentation Centre (EKT) is a R&D organization serving to make scientific knowledge accessible to all so that it can be reused for research, education, development, innovation and society. This includes:

- Collecting, documenting & disseminating quality digital content and data produced by Greek scientific, research and cultural communities
- Measuring outputs of the national RDI system and comparing them to EU/international equivalents
- Ensuring the continuous operation of national digital infrastructures
- Offering a range of services for research, academic, educational and business communities.

The Innovation & Networking Unit of EKT

Our Unit develops integrated services for the digital transformation and strengthening of the country's innovation system. Its purpose is to:

- support innovative companies in Greece, including technology transfer
- the strengthening of cooperation between the research and business communities

Our orientation

Our services are targeted at:

- businesses
 - academic institutions
 - research and development organizations
- to help them realize their scientific potential.

Main goal: to cover their development needs in terms of:

- the new data economy
- the digital economy
- the knowledge society

Networking Services

Support for the development of bilateral partnerships

Support client participation in communities and networks of specialized knowledge

Advisory Services

Support access to European research and innovation programmes

Technology transfer services

The provision of self-diagnostic tools

Information and Training Services

Services providing knowledge and information (e.g. webinars, infodays, etc.)

Training Services providing knowledge and information (e.g. seminars)

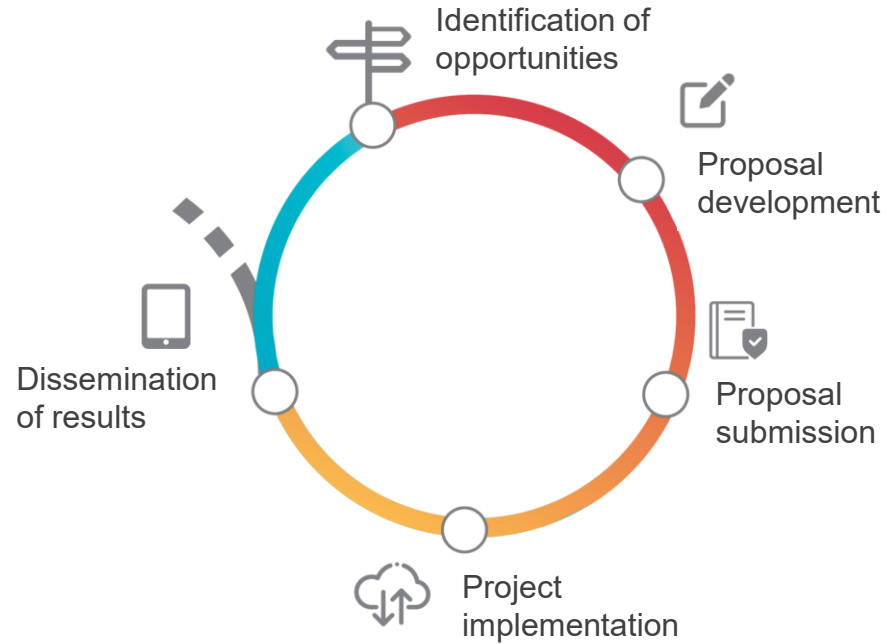

Business Support on Your Doorstep

NCP support at EKT

Support for businesses, academics and research organizations throughout a project's cycle: from identifying funding opportunities to formulating proposals, implementing projects and exploiting research results.
