

# Funding opportunities in Health

Dr Sofia Xesfingi

Horizon Europe NCP (Health & Cancer Mission)  
Project Manager of HNN3.0 and ECHoS in Greece  
Chair of EEN SG Health

# Horizon Europe

**Horizon Europe:** the EU's key funding programme for Research and Innovation

It tackles climate change, helps to achieve the UN's Sustainable Development Goals and boosts the EU's competitiveness and growth.

It facilitates collaboration and strengthens the impact of research and innovation in developing, supporting and implementing EU policies while tackling global challenges.

Engages the EU's talent pool, boosts economic growth, promotes industrial competitiveness and optimises investment impact within a strengthened European Research Area.

With a budget of **95,5 billion euros**.

# Horizon Europe Type of Actions

## **Research and Innovation Actions (RIAs):**

Establish new knowledge or explore a new or improved technology, product, process, service or solution.

The EU funding covers up to 100% of the project costs

## **Innovation Actions (IAs):**

Produce plans or designs for new or improved products, processes or services including prototyping, testing, demonstrating, piloting, large-scale product validation and market replication.

The EU funding covers up to 70% of the project costs.

## **Coordination and Support Actions (CSAs):**

Improve cooperation among EU and associated countries to strengthen the European Research Area including, standardisation, dissemination, awareness-raising, communication and networking activities, policy dialogues, mutual learning or studies.

The EU funding covers up to 100% of the project costs.

## **Programme co-fund actions (COFUND):**

Provide multi-annual co-funding for European Partnerships bringing together public and private partners.

The EU funding covers between 30 and 70% of the project costs.

# Horizon Europe Cluster 1: HEALTH

Europe faced serious healthcare challenges, and the COVID-19 pandemic has shown the importance of coordinating health research and innovation among European countries

The main areas of intervention are:

- ❖ health throughout the life course
- ❖ environmental and social health determinants
- ❖ non-communicable and rare diseases
- ❖ infectious diseases including poverty-related and neglected diseases
- ❖ tools, technologies and digital solutions for health and care including personalised medicine
- ❖ health care systems

**Budget: 8,5 billion euros**

## Cluster 1 Health Destinations

- ④ Staying healthy in a rapidly changing society
- ④ Living and working in a health-promoting environment
- ④ Tackling diseases & reducing disease burden
- ④ Ensuring access to innovative, sustainable & high-quality healthcare
- ④ Unlocking the full potential of new tools, technologies and digital solutions for a healthy society
- ④ Maintaining an innovative, sustainable & globally competitive health industry.

# Cluster 1 Open Calls

## DESTINATION 3

**HORIZON-HLTH-2024-DISEASE-08-12:** Pandemic preparedness and response: Maintaining the European partnership for pandemic preparedness

- Closure: 11 April 2024
- Instrument: CSA
- Budget: 2M€
- Project size: 2M€

**HORIZON-HLTH-2024-DISEASE-08-20:** Pandemic preparedness and response: Host-pathogen interactions of infectious diseases with epidemic potential

- Closure: 11 April 2024
- Instrument: RIA
- Budget: 50M€
- Project size: 7-8M€

## DESTINATION 6

**HORIZON-HLTH-2024-IND-06-08:** Developing EU methodological frameworks for clinical/performance evaluation and post-market clinical/performance follow-up of medical devices and in vitro diagnostic medical devices (IVDs)

- Closure: 11 April 2024
- Instrument: RIA
- Total: 10M€
- Project size: 8-10M€

**HORIZON-HLTH-2024-IND-06-09:** Gaining experience and confidence in New Approach Methodologies (NAM) for regulatory safety and efficacy testing—coordinated training and experience exchange for regulators

- Closure: 11 April 2024
- Instrument: CSA
- Total: 2M€
- Project size: 2M€

## DESTINATION 5

**HORIZON-HLTH-2024-TOOL-11-02:** Bio-printing of living cells for regenerative medicine

- Closure: 11 April 2024
- Instrument: RIA
- Tot: 25M€
- Project size: 6-8M€

## Bio-printing of living cells for regenerative medicine

### Expected outcomes (contributing to **several** of the following elements)

- Biomedical scientists will access **entire bio-printing units for regenerating human tissue**
- **Availability of larger-scale bio-printed tissues** for biomedical research purposes **to both industry and academia**
- Healthcare professionals acquire information on the safe and effective use of advanced therapies
- **Healthcare providers** dispose of tools enabling them to **treat conditions of unmet medical need**
- **Individual patients will benefit from a personalized approach** to their respective medical condition thanks to the **bio-printed regenerative medicine solution**

# Bio-printing of living cells for regenerative medicine

## Scope (address **most** of the following elements)

- Design the **best bio-printing strategy for at least one type of tissue** thanks to a better understanding of the interconnections of the different cell types inside the chosen tissue or organ
- Develop or improve existing equipment able to **print bio-constructs with higher resolution** in a shorter time using various biomaterials and different cell types
- **Cover all steps of the bio-printing suite**, including cell collection, cell differentiation and expansion, imaging, modelling, bio-ink formulation, actual bio-printing, nutrient supply, process monitoring and cell-construct delivery at large site
- **Scale up** the chosen bio-printing technology to a GMP-conform manufacturing process
- **Combine different bio-printing technologies** in order to obtain fully functional synthetic constructs of complex tissues or organs

# Developing EU methodological frameworks for clinical/performance evaluation and post-market clinical/performance follow-up of medical devices and in vitro diagnostic medical devices (IVDs)

## Expected outcomes (contributing to **all** of the following elements)

- **Patients** gain **faster access** to innovative, safe and well-performing **medical devices**
- **Regulators** have access to sound scientific resources for **clinical/performance evaluation** guidance and development of **common specifications** under MDR
- **Notified bodies** have a harmonized way of **assessing the clinical evidence** in the pre-market and post-market phases. Their network will be enhanced
- **Health technology developers** gain insight on the evidence needed to demonstrate that their devices meet **MDR clinical requirements** throughout their timeline. They will have ore guidance on the **use of real-world data**.

# Developing EU methodological frameworks for clinical/performance evaluation and post-market clinical/performance follow-up of medical devices and in vitro diagnostic medical devices (IVDs)

## Scope (address **all** of the following elements)

- Develop technical and regulatory **readiness criteria**
- Reflect on how to provide mechanisms to support **technology transfer**
- Discuss how to **standardise NAMs and NAM-based strategies** via international organisations
- Provide technical **training for Contract Research Organisations**
- Promote dialogue on how to **integrate and interpret data** from NAMs and facilitate their **uptake for safety and efficacy testing**
- Identify **obstacles in EU legislation** for the regulatory use of NAMs and propose **options/changes**

## EU Missions

A mission is a portfolio of actions across disciplines intended to achieve a bold and inspirational and measurable goal within a set timeframe, with impact for society and policy making as well as relevance for a significant part of the European population and wide range of European citizens.

Adaptation to  
climate change,  
including societal  
transformation

**Cancer**

Healthy  
oceans,  
coastal  
& island  
waters

Climate-  
neutral &  
smart cities

Soil  
health  
& food

# Conquering Cancer: Mission Possible

Cancer Mission started on September 2021, alongside Europe's Beating Cancer Plan (started February 2021)

## Targets by 2030

- More than 3 million more lives saved, living longer and better,
- Achieve a thorough understanding of cancer,
- Prevent what is preventable,
- Optimise diagnosis and treatment,
- Support the quality of life of all people exposed to cancer, and
- Ensure equitable access to the above across Europe

## NCP related networks

<https://www.healthncp.net/>

We are a network of National Contact Points (NCPs) in the area of “Health” enhancing transnational cooperation between NCPs for Cluster 1 Health in Horizon Europe to increase the support for those interested in research funding.

Aim: to harmonize and improve the quality and variety of NCP services in order to achieve a stable level of support between all EU Member States and Associated Countries.

[www.cancermissionhubs.eu](http://www.cancermissionhubs.eu)

ECHO S will set the foundations for the creation of a future European Network of National Cancer Mission Hubs (NCMHs).

Aim: to support the implementation of the Cancer Mission activities in all Member States and Associated Countries through the establishment and development of Cancer Mission Hubs operating at national, regional, and local levels.

## European Partnerships

European Partnership are initiatives in which the EU and private and/or public partners, commit to jointly support the development and implementation of a programme of research and innovation activities, including market, regulatory or policy uptake.

The aim of European Partnerships with EU and associated countries, the private sector, foundations and other stakeholders is to deliver on global challenges and modernise industry.

- ✓ Institutionalised Partnerships: These are partnerships in the field of research and innovation between the Union, EU member states and/or industry.
- ✓ Co-Programmed Partnerships: These are partnerships between the Commission and mostly private (and sometimes public) partners.
- ✓ Co-Funded Partnerships: These are partnerships involving EU countries, with research funders and other public authorities at the core of the consortium.

## European partnerships in the structure of HE

PILLAR II – Global challenges & European industrial competitiveness				PILLAR III – Innovative Europe	
Cluster 1: Health	Cluster 4: Digital, industry and space	Cluster 5: Climate, energy and mobility	Cluster 6: Food, bioeconomy, natural resources, agriculture and environment	EIT: The European Institute of Innovation and Technology	European innovation ecosystems

## 9 European partnerships for Health Resilience

- 34% of HORIZON EUROPE Partnership funding is expected to contribute to the EU's resilience
- Find out more: [Biennial Monitoring Report 2022](#)
- Some examples
  - ✓ Global Health EDCTP3: global cooperation on effective and rapid research to address future epidemics and pandemics
  - ✓ Risk Assessment of Chemicals: Supports EU and national chemical risk assessment and management with new data, networks and skills
  - ✓ Innovative Health Initiative: cross-sectoral collaboration brings together researchers, healthcare professionals, regulators, digital companies and others

# Financial Support to Third Parties: Cascade funding

Cascade Funding is a European Commission mechanism to distribute public funding in order to assist beneficiaries, such as start-ups, scale-ups, and/or SMEs in the uptake or development of digital innovation.

Aim: simplifying the administrative procedures, creating a light & SME-friendly application scheme, by allowing that some EU-funded projects may issue, in turn, open calls for further funding

## “Culture Helps / Культура допомагає”: Individual grants for mental health support (third call)

Culture helps **Cascade funding**  
Creative Europe Programme (CREA)

**Deadline model** single-stage

**Opening date** 27 September 2023  
**Deadline date** 1 December 2023 17:00:00 Brussels time

# PCPs and PPIs

- Pre-Commercial Procurement (PCP) challenges industry from the demand side to develop innovative solutions for public sector needs → PCP enables public procurers to compare alternative potential solution approaches and filter out the best possible solutions that the market can deliver to address its needs.
- Public procurement of innovative solutions (PPI) happens when the public sector uses its purchasing power to act as early adopter of innovative solutions which are not yet available on large scale commercial basis.

## Horizon Europe funding for PCP and PPI

Horizon Europe offers the following funding opportunities for consortia of procurers:

- To prepare and undertake together PCP or PPI procurements
- To cooperate on identifying opportunities and preparing for future PCPs / PPIs

There are 263M EURO of funding opportunities in different fields: health, security, climate change and research infrastructures etc.

In addition, public procurers can also propose themselves to implement PCPs in any call for Research and Innovation (RIA) actions in the WP that does not require the participation of industry in the consortium.

Public authorities that want to implement joint cross-border innovation procurement calls via their national funding programmes can also apply for support for such joint PCP/PPI calls via the HE programme co-fund actions.

Find open calls here: [Overview of all the calls in support of PCP and PPI in 2023-2024](#)

## National PCPs → EU funded PPIs

Solution design, prototyping, development,  
testing and installation of first products

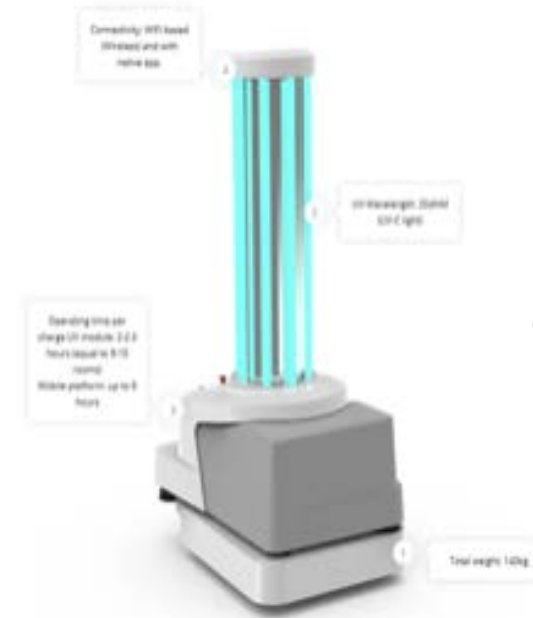

Wider diffusion of solutions across different  
customers and markets

Find more examples [here](#)

PCP by Norwegian government resulted in deployment (EFTA funding) of the world's first and largest full scale carbon capture, transport and storage facility.

This will reduce by 14% the CO2 emissions across the entire EU.

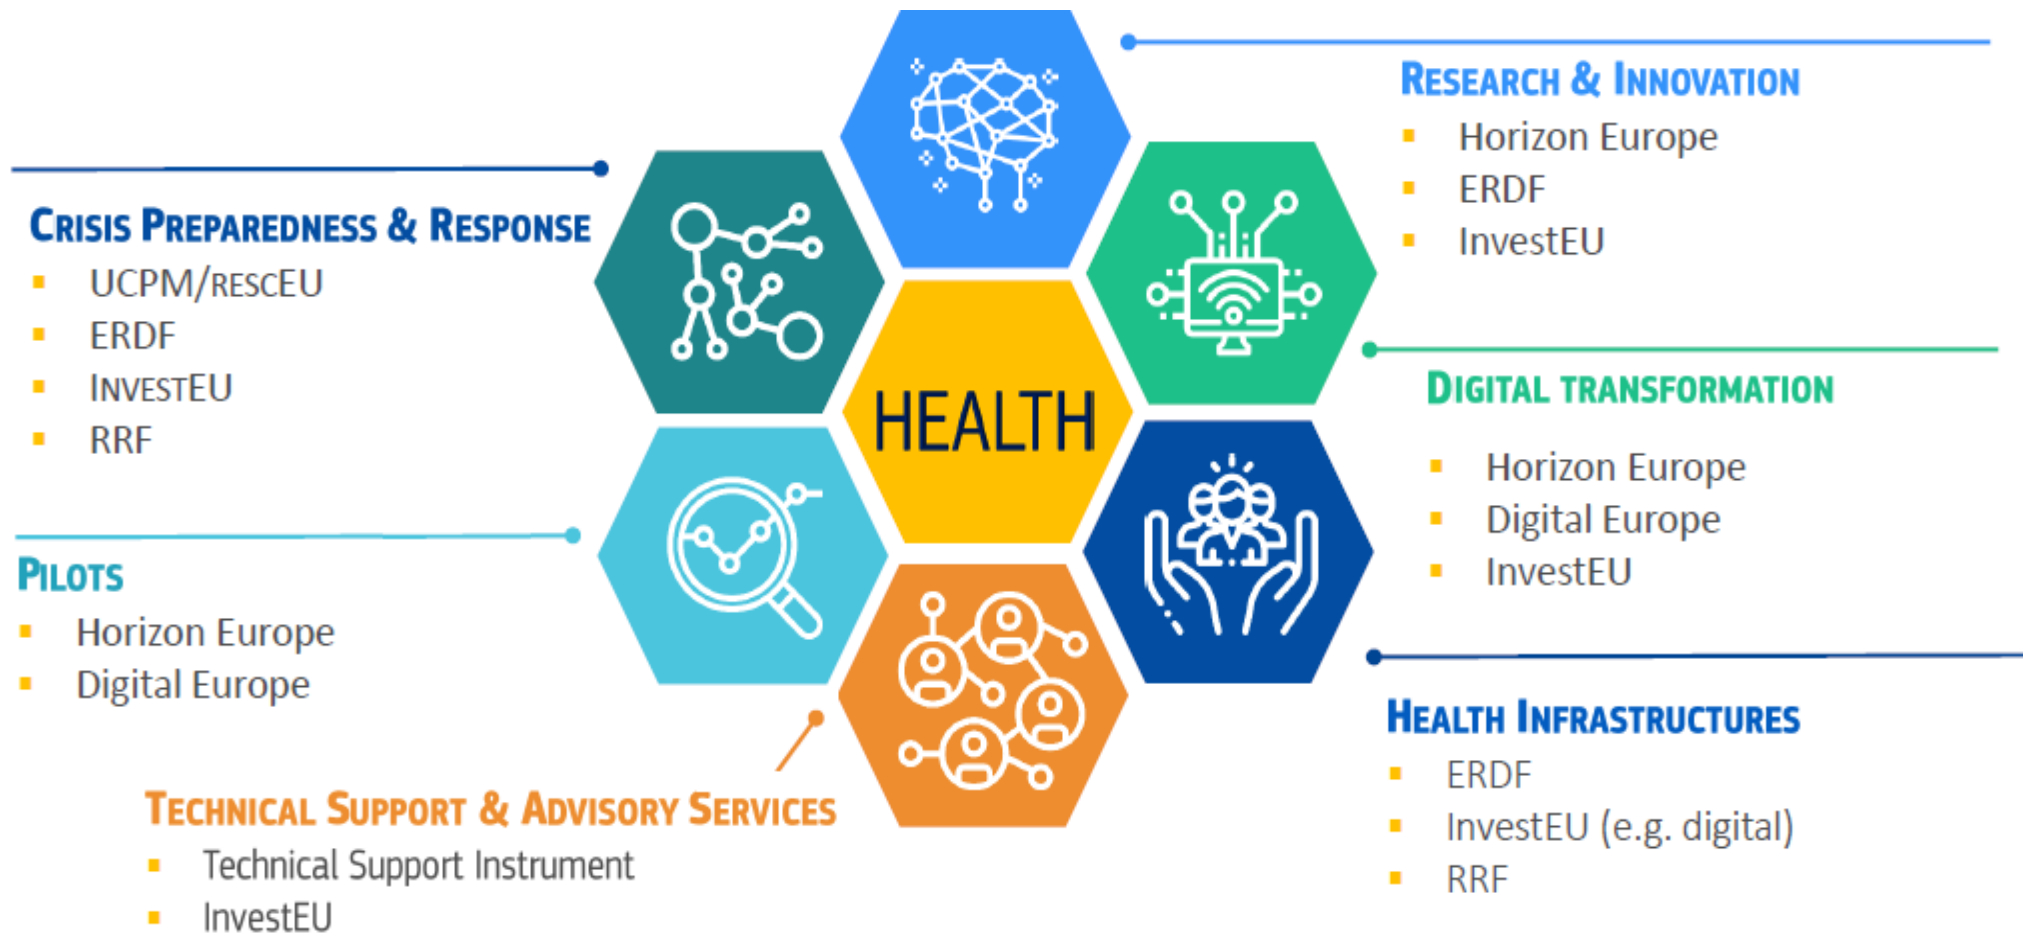

PCP by Danish hospitals

Blue Ocean Robotics  
(Danish startup → unicorn)  
Its disinfection robots kill 99% of all viruses, bacteria and are sold to fight COVID-19.

EC procured 200 robots for hospitals across Europe,  
speeding up wider diffusion.
