## EKT'S SERVICES IN THE HEALTH- CARE SECTOR

The National Documentation Centre (EKT) provides integrated services to the research community, health organisations, start-ups and innovative businesses. The services concern funding opportunities, integration of digital technologies, training and networking in the healthcare sector.

The National Documentation Centre (EKT) is:

**EIT Health Hub,**

the EU's initiative to promote innovation in the healthcare sector.

**National Contact Point for Cluster 1 (Health)  
and Cancer Mission in Horizon Europe,**

the EU's largest research and innovation funding programme.

**Member of the Enterprise Europe Network,**

the European business support network.

NATIONAL DOCUMENTATION CENTRE

**Empowering health start-ups.** Providing access to finance, testbeds, pilots and more and creating high-quality education programmes for executives, students and alumni. Consulting services from world-renowned experts and valuable networking opportunities. 266 partners connecting and expanding an ecosystem of companies, universities, research and development centres, hospitals and institutes to promote innovation in the health sector.

**Connecting hospitals with start-ups operating in the health sector.** Access to more than 17 hospitals and clinics with new additions each year, networking and exploring partnerships for the development of innovative products and services and conducting pilot trials in real environments.

**Providing customised advisory services for successful European RnI projects.** Strengthening the Greek community and its participation in Horizon Europe Programmes. Liaising with the General Directorates of the European Commission. Cooperation with other Clusters and Missions. Organization of Info-days. Dedicated newsletters, instructions and material. Promote networking.

**Core partner of HHN3,** the European network of National Contact Points for Cluster 1 (Health). Support the research community at the national level. International networking and information services, creation of toolkits and organization of information events.

**Establishment of Cancer Mission Hubs** with the aim of improving the quality of life for 3 million patients in Europe by 2030. Establishment of National Cancer Mission Hub supporting national information, prevention, diagnosis and treatment services. Strengthening the four pillars of the Cancer Mission and the domestic ecosystem.

**Customised services for international growth and networking,** innovation management, technology transfer, digital transformation, access to finance, international partnerships, sustainability and resilience for SMEs and start-ups.
